EDUCATION

Indian Institute of Technology (IIT) Kharagpur
Integrated B.S. + M.S. in Mathematics and Computing

Jul 2015 – Jun 2020
Kharagpur, India

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, C++, Swift, C#, Go, Solidity, Kotlin, SQL
Frameworks: React, React Native, .NET Core, TensorFlow, Keras, Flask, Node.js, GraphQL
Cloud & AI: Azure (App Service, AI Foundry), Microsoft AI Tools, MCP, OpenAI API
Tools: Git, CI/CD, KQL, NoSQL (CosmosDB), IPFS, Android WebView, RESTful API Design

PROFESSIONAL EXPERIENCE

Microsoft

Software Engineer 2

Mar 2023 – Present

Hyderabad, India

- Engineered a custom Native Android WebView reducing page load times by 57% (12.9s to 5.5s) via disk-based caching strategies.
- Led SharePoint News API migration, delivering revamped architecture and modern UX while mentoring 2 engineers for on-time delivery.
- Owned end-to-end delivery of high-impact React Native features for 3M+ users, collaborating with stakeholders to maintain 99.9% reliability.
- Architected a config-based component framework, enabling 40% faster feature development and onboarding for partner teams.
- Core contributor to Viva Connections, driving full-stack development and scalability to support a global base of over 9M+ MAU.

Microsoft

Software Engineer

Jul 2020 – Mar 2023

Hyderabad, India

- Architected a performant notification system via rigorous API contracts, ensuring low-latency delivery and UI state consistency.
- Engineered a data scoping paradigm for 5+ enterprise scenarios in a shared JS runtime, enhancing code modularity and security.
- Developed a robust link interception module, directing 2M+ users to correct in-app experiences with 99.9% production reliability.
- Created in-app developer diagnostic tools that reduced debugging time by 60+ man-hours monthly, boosting overall team velocity.

Samsung Research Institute

Research Intern (Deep Learning)

May 2019 – Jul 2019

Bengaluru, India

- Developed a DL solution to eliminate manual calibration for wearable controllers using TensorFlow and Keras for real-time data.
- Engineered a specialized RNN model to predict calibration parameters, achieving a 75% error reduction via custom loss functions.

Prakshep

Data Science Intern

May 2018 – Jun 2018

Bengaluru, India

- Analyzed Sentinel-2 satellite imagery using Python and OpenCV to classify water bodies and agricultural lands with high accuracy.
- Designed statistical Z-score models for spectral indices to identify harvest windows and outlier plots for precision farming insights.

Farebond

Data Science Intern

May 2017 – Aug 2017

Bengaluru, India

- Built a tier-based pricing model for flight fare locks, categorizing flights by volatility to optimize revenue margins and conversion.
- Developed an automated reporting system using R and R Markdown, saving 60+ man-hours of manual data entry work monthly.

TECHNICAL PROJECTS

Obsidian MCP Server | GitHub

TypeScript, Node.js, Model Context Protocol (MCP)

2025

- Developed an MCP server enabling LLMs to interact with Obsidian vaults for automated note management and searching.
- Implemented secure file system operations and integrated with Obsidian REST API to provide real-time context to AI agents.

Portfolio Website | aniketbiswas.dev

React, TypeScript, GraphQL

2025

- Engineered a data-driven architecture using a GraphQL layer to transform external content and Medium RSS feed data.
- Integrated automated fallback mechanisms and responsive UI components to ensure seamless cross-device compatibility.

CERTIFICATIONS

- AI Readiness: Intermediate Proficiency, AI Foundations (Skillup AI IDC)
- Anthropic: Introduction to Model Context Protocol & Model Context Protocol: Advanced Implementation Topics
